Site URL: <https://lucy-lopez.fr>

Email

lucy.lopez9605@gmail.com

This is where you will receive your license key and any future security alerts for your website

Would you like WordPress security and vulnerability alerts sent to you via email?

Yes No

☒ I have read and agree to, as applicable, the [Wordfence License Terms and Conditions](#), [Wordfence CLI License Terms and Conditions](#), the [Services Subscription Agreement](#), and [Terms of Service](#), and have read and acknowledge the [Wordfence Privacy Policy and Notice at Collection](#).

Register

Check your email

You're almost done! Your license key has been sent to lucy.lopez9605@gmail.com. **Check your email to complete the installation.** You can also request free keys on the license page when logged in to wordfence.com.

If you need additional help, you can visit [our documentation](#) to get help installing your license.

[Can't find the email?](#)

Sur notre mail on reçoit la clé de la licence :

Install Your Wordfence License

Thank you for registering for a Wordfence Free license. Your firewall rules and malware signatures will be delayed by 30 days with Wordfence Free edition.

[If you choose to upgrade to receive real-time firewall rules and malware signatures, you can click here to get Wordfence Premium.](#)

To complete the installation of Wordfence Free, you have two options.

Automatic Installation

Click the button below to automatically install the license key for <https://lucy-lopez.fr>

Install My License Automatically

The button above is valid for up to 24 hours and only within the same browser from which the license key was requested. After that time period, or when accessing your site from a different browser, you will need to install the key manually.

On installe la licence sur notre site web :

Install Wordfence

Install your license to finish activating Wordfence.

Email

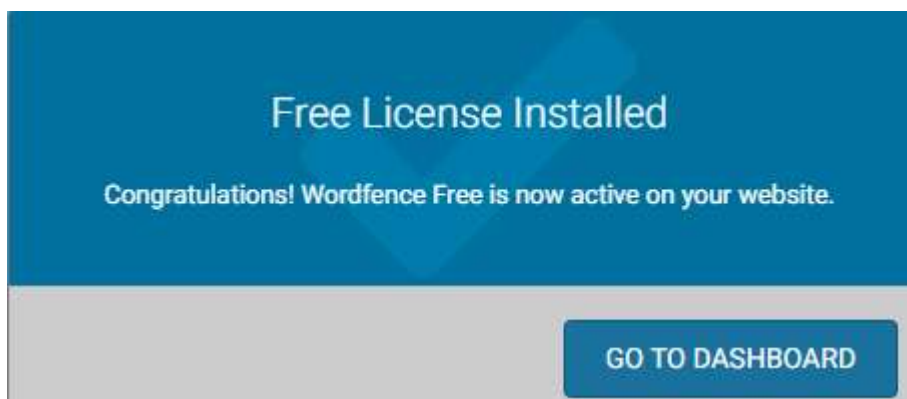

lucy.lopez9605@gmail.com

This is where future security alerts for your website will be sent. This can also be changed in Global Options.

Tools

Max Login Retries

3

Number of failed login attempts within the "Retry Time Period Restriction" (defined below) needed to trigger a Lockdown.

Retry Time Period Restriction

5 minutes

The time in which failed login attempts are allowed before a lockdown occurs.

Lockout Length

60 minutes

The time a particular IP will be locked out once a lockdown has been triggered.

Log Failed Attempts With Non-existent Usernames

☒

Log failed log in attempts with non-existent usernames the same way failed attempts with bad passwords are logged.

Mask Login Errors

☐

Hide log in error details (such as invalid username, invalid password, invalid captcha value) to minimize data available to attackers.

Block Type

☐ Completely block website access
 ☒ Only block access to the login page

Completely block website access for blocked IPs, or just blocking access to the login page.

Block Message

We're sorry, but your IP has been blocked due to too many recent failed login attempts

Message displayed to visitors blocked due to too many failed login attempts. Default: *We're sorry, but your IP has been blocked due to too many recent failed login attempts.*

Whitelisted IPs

List of IP addresses that will never be blocked. Enter one IP per line.

Your current IP is: 193.253.47.184

Show Credit Link

☐

Show a small "form protected by" link below the login form to help others learn about the free Login Lockdown plugin & protect their sites.
